All a powered subwoofer needs, in addition to AC power, is a line output (sub out, pre-out, or LFE out) from a home theater receiver. This arrangement takes a lot of the power load away from the amp/receiver and allows the amp/receiver to power the mid-range and tweeters more easily. Most subwoofers used in home theater setups are the powered type.

This expensive subwoofer is a worthy addition to almost any combination of Sonos speakers. It's well made, heavy and easy to install. I have the Play5 in a stereo pair in a family room, with the sub hidden behind the couch and the low frequency sound mysteriously appears, smooth and punchy. It took a few tries with Trueplay to adjust to the final speaker locations, but the sub is very ...
